What is wheel barrow?

- Wheel barrow is small hand vehicle, usually with just one wheel, designed to be pushed & guided by a single person using two handle at rear.
- It is designed to distribute the weight of its load between the operator, so enabling the convenient carriage of heavier & bulk load than would be possible were the weight carried entirely by the operator.

KEY FEATURE:-

- PVC grip for better handling.
- Bucket constructed from IFF grade raw material with thickness 0.8 mm.
- It is mould product not a weld over a bucket.
- 4mm round beading over bucket border for better strength.
- Chassis is constructed from CR pipe.
- Heavy duty solid rubber wheel with bearing for easy movement in bulk load.
- Electro powder coating for better paint life.
